

Stack Overflow Developer Survey 2019

Sheersh Patel

February 8, 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data contextualization & analysis goal.
- Methodology
 - Data Collection
 - Data Analysis
 - Data Visualization
- Results presentation supported with graphs & trends.
- Discussion of overall findings & implications regarding the result previously exposed.
- Final conclusion of the carried out research.

INTRODUCTION

- Stack Overflow's annual Developer Survey is the largest and most comprehensive survey of people who code around the world.
- Results don't represent everyone in the developer community evenly.
- Nearly 90,000 developers.
- Trends to predict where the developers are going.
- Characterization of developers around the globe.

METHODOLOGY

- Collect survey data & explore its content
 - API
 - Web Scrapping
 - Request Library
- Data Wrangling
- Exploratory Data Analysis
 - Analyzing data distribution
 - Handling outliers
 - Correlations
- Data Visualization
 - Highlight distribution of data, relationships, the composition & comparison of data
- Dashboard

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Worked With

Next Year

Top 10 Desired Languages for Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript seems to keep as leading language.
- Python is the fastest growing language
- Most of the developers have keen interest in TypeScript

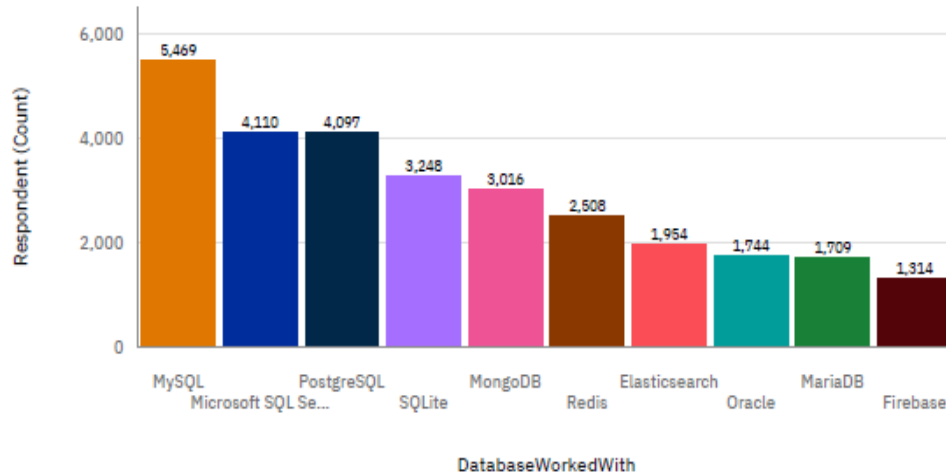

Implications

- Possible developers migration from JavaScript to TypeScript.

DATABASE TRENDS

Current Year

Top 10 Databases Worked With

Next Year

Top 10 Desired Databases for Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is the most used database.
- Lack of interest in Microsoft SQL Server & SQLite.
- Increasing interest in PostgreSQL and MongoDB.

Implications

- Microsoft SQL Server & SQLite losing ground in the market.
- PostgreSQL & MongoDB establishment in the market.

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript widely used & TypeScript getting popular.
- Over 90% of developers are young males.
- Developers mostly located in developed countries.

Implications

- JavaScript & TypeScript web frameworks are gaining more attention.
- Global polarization of developers location & gender.
- Young developers without postgrad studies on its majority.

CONCLUSION

- Developers are people with very marked characteristics.
- An increasing popularity for web frameworks, tools and languages related to web applications like JavaScript & TypeScript.
- There is still a lot of work to be done in order to encourage woman to start learning at least one programming language.
